Fly tying is the process of producing an artificial fly used by fly fishing anglers to catch fish.. Helen Shaw, an American professional fly tyer, defined it as the "simple process of binding various materials to a hook with thread". However, thread is no longer always necessary since modern materials such as UV-cured resins can be used to fix the materials to the hook.

A parasite is an organism that lives on or in a host and gets its food from or at the expense of its host. Parasites can cause disease in humans. Some parasitic diseases are easily treated and some are not. The burden of these diseases often rests on communities in the tropics and subtropics, but parasitic infections also affect people in developed countries.
