Introduction. Six years have transpired since publication of the last policy statement of the American Academy of Pediatrics (AAP) regarding breastfeeding. 1 Recently published research and systematic reviews have reinforced the conclusion that breastfeeding and human milk are the reference normative standards for infant feeding and nutrition. The current statement updates the evidence for ...

Overview. According to a study by RAND Health, the U.S. healthcare system could save more than \$81 billion annually, reduce adverse healthcare events, and improve the quality of care if health information technology (HIT) is widely adopted. The most immediate barrier to widespread adoption of technology is cost despite the patient benefit from better health, and payer benefit from lower costs.
