In article number 1800053, graphene-polypyrrole composites with three-dimensional digitally designed architectures were demonstrated by Cheng Zhu and co-workers via chemical deposition of polypyrrole thin-films onto 3D printed graphene aerogels. Taking advantage of the 3D digital designed architectures, the areal capacitance was greatly enhanced, thus allowing full utilization of the limited ...

Advanced steam technology (sometimes known as modern steam) reflects an approach to the technical development of the steam engine intended for a wider variety of applications than has recently been the case. Particular attention has been given to endemic problems that led to the demise of steam power in small- to medium-scale commercial applications: excessive pollution, maintenance costs ...
