Modern portfolio theory (MPT), or mean-variance analysis, is a mathematical framework for assembling a portfolio of assets such that the expected return is maximized for a given level of risk. It is a formalization and extension of diversification in investing, the idea that owning different kinds of financial assets is less risky than owning only one type.

Arthur Wharton (28 October 1865 " 13 December 1930) is widely considered to be the first black professional footballer in the world. Though not the first black player outright " the amateurs Robert Walker, of Queen's Park, and Scotland international player, Andrew Watson predate him " Wharton was the first black professional and the first to play in the Football League

Box and Cox (1964) developed the transformation. Estimation of any Box-Cox parameters is by maximum likelihood. Box and Cox (1964) offered an example in which the data had the form of survival times but the underlying biological structure was of hazard rates, and the transformation identified this.
