Blood transfusion is generally the process of receiving blood or blood products into one's circulation intravenously. Transfusions are used for various medical conditions to replace lost components of the blood. Early transfusions used whole blood, but modern medical practice commonly uses only components of the blood, such as red blood cells, white blood cells, plasma, clotting factors, and ...

My mother instilled in me a love of reading, so when I discovered several of Sabatini's titles in a bookstore, I bought Captain Blood. Many years later, I did some pirate research that took me back to this novel. As I reread Captain Blood in preparation for writing this article, I realized how much I hadn't understood the first time.
