Health is the ability to adapt and manage physical, mental and social challenges throughout life. As defined by the World Health Organization (WHO), health is "a state of complete physical, mental and social well-being and not merely the absence of disease or infirmity." This WHO definition has been subject to controversy, as it may have limited value for implementation.

A year or two ago, I saw the much-touted science fiction film Interstellar, and although the plot wasnâ€™t any good, one early scene was quite amusing. For various reasons, the American government of the future claimed that our Moon Landings of the late 1960s had been faked, a trick aimed at winning the Cold War by bankrupting Russia into fruitless space efforts of its own.
