

complex numbers b s pdf

A complex number is a number of the form $a + bi$, where a and b are real numbers and i is an indeterminate satisfying $i^2 = -1$. For example, $2 + 3i$ is a complex number. A complex number may therefore be defined as a polynomial in the single indeterminate i , with the relation $i^2 + 1 = 0$ imposed. From this definition, complex numbers can be added or multiplied, using the addition and ...

Complex number - Wikipedia

Lecture 1 Complex Numbers Definitions. Let $i^2 = -1$. $i = \sqrt{-1}$. Complex numbers are often denoted by z . Just as \mathbb{R} is the set of real numbers, \mathbb{C} is the set of complex numbers. If z is a complex number, z is of the form $z = x + iy \in \mathbb{C}$, for some $x, y \in \mathbb{R}$. e.g. $3 + 4i$ is a complex number. $z = x + iy$ real part imaginary part.

Lecture 1 Complex Numbers - 4unitmaths.com

In mathematics, the complex plane or z -plane is a geometric representation of the complex numbers established by the real axis and the perpendicular imaginary axis. It can be thought of as a modified Cartesian plane, with the real part of a complex number represented by a displacement along the x -axis, and the imaginary part by a displacement along the y -axis.
