

digging the wells of pdf

A water well is an excavation or structure created in the ground by digging, driving, boring, or drilling to access groundwater in underground aquifers. The well water is drawn by a pump, or using containers, such as buckets, that are raised mechanically or by hand.

Water well - Wikipedia

Biblical Well Producers? Through the ages Christians have come to believe that there were three men mentioned in the Bible who built wells or extracted water from the ground.

A Brief History of Well Construction - well drilling school

Let's begin with some hard facts: about 97% of our fresh water supply lays hidden beneath the Earth's surface in underground aquifers and there are over fifteen million water wells in America.
