Relational inductive biases, deep learning, and graph networks

The CPL is an interdepartmental neuroscience research laboratory at Cornell University in Ithaca, NY.. Work in our lab centers around questions about neural coding, neuromodulation, and the neural bases of learning and memory processes, and is mostly based in the olfactory systems of rats and mice.

Volume 4, Number 2, REFLECTIONS 4 Teaching Smart People How to Learn Chris Argyris Any company that aspires to succeed in the tougher business environment of the 1990s must first resolve a basic dilemma: success in the marketplace increasingly depends

Teaching Smart People How to Learn

Lifelong learning is the "ongoing, voluntary, and self-motivated" pursuit of knowledge for either personal or professional reasons. Therefore, it not only enhances social inclusion, active citizenship, and personal development, but also self-sustainability, as well as competitiveness and employability.

Double-loop learning (see diagram below) is used when it is necessary to change the mental model on which a decision depends. Unlike single loops, this model includes a shift in understanding, from simple and static to broader and more dynamic, such as taking into account the changes in the surroundings and the need for expression changes in ...
