The meaning of physics in Aristotle. It is a collection of treatises or lessons that deal with the most general (philosophical) principles of natural or moving things, both living and non-living, rather than physical theories (in the modern sense) or investigations of the particular contents of the universe.

According to 20th-century conventional wisdom, load sharing (section 2.2) and voltage stability (section 2.1) must rely on basic physics, because there is no time for anything else. Similarly, because electricity travels at essentially the speed of light, there is a wide class of problems for which you cannot send any timely warning; the problem would arrive at least as soon as the ...
