The rapid changes in LED lighting technology have given rise to an LED retrofit revolution. Across the globe, municipalities are opting to switch out their

5 Popular Myths About LED Streetlights - Light pollution

Best Practice: LED Street Lighting System

Best Practice: LED Street Lighting System

An LED street light is an integrated light that uses light emitting diodes (LED) as its light source. These are considered integrated lights because, in most cases, the luminaire and the fixture are not separate parts. In manufacturing, the LED light cluster is sealed on a panel and then assembled to the LED panel with a heat sink to become an integrated lighting fixture.

LED street light - Wikipedia

DOT maintains over 250,000 street lights throughout New York City, and is a national leader in using sustainable street lighting. In the largest such project in the country, DOT is currently retrofitting all of New York City's street lights with energy-efficient LEDs. The new lighting will save ...
