Self-Determination Theory (SDT) is a theory of motivation.. It is concerned with supporting our natural or intrinsic tendencies to behave in effective and healthy ways. SDT has been researched and practiced by a network of researchers around the world.. The theory was initially developed by Edward L. Deci and Richard M. Ryan, and has been elaborated and refined by scholars from many countries.

2 "Trickle Down" Theory and "Tax Cuts for the Rich" non-existent theory* has become the object of denunciations from the pages of the New York Times and the Washington Post to the political arena. It has been attacked by Professor Paul Krugman of Princeton and

"Trickle Down" Theory and "Tax Cuts for the Rich"

Probability theory is the branch of mathematics concerned with probability. Although there are several different probability interpretations, probability theory treats the concept in a rigorous mathematical manner

by expressing it through a set of axioms. Typically these axioms formalise probability in terms of a probability space, which assigns a measure taking values between 0 and 1, termed ...
