

electromagnetism theory and problems pdf

Classical electromagnetism or classical electrodynamics is a branch of theoretical physics that studies the interactions between electric charges and currents using an extension of the classical Newtonian model. The theory provides an excellent description of electromagnetic phenomena whenever the relevant length scales and field strengths are large enough that quantum mechanical effects are ...

Maxwell's equations are a set of partial differential equations that, together with the Lorentz force law, form the foundation of classical electromagnetism, classical optics, and electric circuits. The equations provide a mathematical model for electric, optical and radio technologies, such as power generation, electric motors, wireless communication, lenses, radar etc. Maxwell's equations ...

FUNDAMENTAL UNSOLVED PROBLEMS IN PHYSICS AND ASTROPHYSICS

General Relativity, Non-Abelian Gauge Theories, and Quantum Gravity. Authors: F. Winterberg Comments: 11 Pages. We adopt here an attempt first pioneered by Dehnen to reformulate Einstein's general theory of relativity as a kind of non-Abelian gauge theory, as is quantum chromodynamics.
