The slope deflection method is a structural analysis method for beams and frames introduced in 1914 by George A. Maney. The slope deflection method was widely used for more than a decade until the moment distribution method was developed. In the book, "The Theory and Practice of Modern Framed Structures", written by J.B Johnson, C.W. Bryan and F.E. Turneure, it is stated that this method was ...

Path analysis is an advanced statistical technique for examination of dependent and independent variables to reveal the relative effects of each variable on the other variables in the model (Allen 1997; Schumacker and Lomax 2004). Path analysis starts with a theory bound approach revealed with the construction of an explicitly formulated structural model (path diagram) that provides a pictorial ...
