Purpose of this note is to provide an introduction to some aspects of hyperbolic geometry. Topics covered includes: Length and distance in hyperbolic geometry, Circles and lines, Mobius transformations, The Poincaré disc model, The Gauss-Bonnet Theorem, Hyperbolic triangles, Fuchsian groups, Dirichlet polygons, Elliptic cycles, The signature of a Fuchsian group, Limit sets of Fuchsian groups ...

Mathematical logic is a subfield of mathematics exploring the applications of formal logic to mathematics. It bears close connections to metamathematics, the foundations of mathematics, and theoretical computer science. The unifying themes in mathematical logic include the study of the expressive power of formal systems and the deductive power of formal proof systems.

An RLC circuit is an electrical circuit consisting of a resistor (R), an inductor (L), and a capacitor (C), connected in series or in parallel. The name of the circuit is derived from the letters that are used to denote the constituent components of this circuit, where the sequence of the components may vary from RLC.

1. Introduction. For many reasons such as competitive marketplace, engineers are not only interested in designing a constructive structure, but they also seek for the best design.

## A review on optimization of composite structures Part I

Gmsh. Christophe Geuzaine and Jean-François Remacle Gmsh is an automatic 3D finite element mesh generator with build-in pre- and post-processing facilities.

## Gmsh 3.0

The problem: RSA, the most common form of public key encryption, is based on the fact that large numbers are hard to factor. Without going into too much detail, an encryption key  $M$ , is the product of two large primes  $P$  and  $Q$  ( $M=PQ$ ), and breaking the key comes down to finding  $P$  and  $Q$ , given  $M$ .
