

financial forecasting analysis and pdf

eFinancialModels offers a wide range of industry specific excel financial models, projections and forecasting model templates from expert financial modeling freelancers.

Financial Projections & Forecasting Excel Models Templates

A financial forecast is an estimate of future financial outcomes for a company or country (for futures and current markets). Using historical internal accounting and sales data, in addition to external market and economic indicators, a financial forecast is an economist's best guess of what will happen to a company in financial terms over a given time period—which is usually one year.
