The purpose of this paper is to review international practice in the rock mechanics and rock engineering design of rock anchors which, as will be shown, has remained largely unchanged since the 1970s.

Rock engineering design of post-tensioned anchors for dams

Mechanical engineering is the discipline that applies engineering, physics, engineering mathematics, and materials science principles to design, analyze, manufacture, and maintain mechanical systems. It is one of the oldest and broadest of the engineering disciplines.. The mechanical engineering field requires an understanding of core areas including mechanics, dynamics, thermodynamics ...

Biomedical Engineering Master of Engineering (M.E.) Requirements. Specializations: Biocomputing, Bioimaging, Bioinstrumentation, Biomechanics, Biorehabilitation Upon enrolling in the master of engineering program in biomedical engineering, a student selects one of five specializations and follows the curriculum designed for that specialization.

Deformation in continuum mechanics is the transformation of a body from a reference configuration to a current configuration. A configuration is a set containing the positions of all particles of the body. A deformation may be caused by external loads, body forces (such as gravity or electromagnetic forces), or changes in temperature, moisture content, or chemical reactions, etc.

Solution annealing to increase the stability of methylammonium lead iodide (CH₃NH₃PbI₃) based solar cells towards humidity by accessing cubic phase films in the solid state at room temperature is demonstrated. The cubic phase prevents the formation of perovskite monohydrate on exposure to humidity, which is a pathway of degradation in conventionally processed perovskite thin films.

Quantum mechanics at its heart is the study of the building blocks of the universe “ what they are and how they work together to form reality as we are able to interpret it. Its ideas were first developed almost a century ago with such notables as Albert Einstein and Niels Bohr developing theories and debating ideas such as whether particles exist at certain places at certain times, or ...
