Environmental and Social Handbook

Climate change denial, or global warming denial, is part of the global warming controversy. It involves denial, dismissal, or unwarranted doubt that contradicts the scientific opinion on climate change, including the extent to which it is caused by humans, its impacts on nature and human society, or the potential of adaptation to global warming ...

Handbook for the introduction of Building Information

The climate of the Falkland Islands is cool and temperate, regulated by the large oceans which surround it. The Falkland Islands are located over 480 kilometres (298 mi) from South America, to the north of the Antarctic convergence, where cooler waters from the south mix with warmer waters from the north.
