

identifying and interpreting animal pdf

Psychological testing is the administration of psychological tests, which are designed to be "an objective and standardized measure of a sample of behavior". The term sample of behavior refers to an individual's performance on tasks that have usually been prescribed beforehand. The samples of behavior that make up a paper-and-pencil test, the most common type of test, are a series of items.

Affective computing (sometimes called artificial emotional intelligence, or emotion AI) is the study and development of systems and devices that can recognize, interpret, process, and simulate human affects. It is an interdisciplinary field spanning computer science, psychology, and cognitive science. While the origins of the field may be traced as far back as to early philosophical inquiries ...

[2] For example, the Royal Society for the Prevention of Cruelty to Animals (RSPCA) describes itself as "the largest non-governmental law enforcement agency in England and Wales" and is the de facto prosecutorial authority for many animal cruelty cases there. It was formed in 1824 and inspired the formation of similar volunteer charitable societies in other countries.
