Determination of surface energy. Measuring the surface energy of a solid. The surface energy of a liquid may be measured by stretching a liquid membrane (which increases the surface area and hence the surface energy). In that case, in order to increase the surface area of a mass of liquid by an amount, ΔA , a quantity of work, $\gamma \Delta A$, is needed (where γ is the surface energy density of the ...

Etymology and definition. The term surfactant is a blend of surface active agent.. In the United States National Library of Medicine's Medical Subject Headings (MeSH) vocabulary, surfactant is reserved for the meaning pulmonary surfactant. For the more general meaning, surface active agent/s is the heading.

ABSTRACT. An efficient method for preparing petroleum sulfonates is described in this article. Petroleum sulfonates were prepared from five different refinery cuts and characterized by infrared and ultra-violet spectroscopy.

The primary function of the carbonaceous materials is to act as a reductant, i.e., to react with the metal oxide and to form carbon monoxide. They are also a source of carbon in Fe-Mn and Fe-Cr alloys.

Abstract. An understanding of the mechanisms by which oil is displaced from porous media requires the knowledge of the role of wettability and capillary forces in the displacement process.

Pickering emulsions are attractive formulations because they are simple and bear strong similarities with the well-known surfactant-based emulsions.

ABOUT THIS JOURNAL Welcome to the home page of Reviews of Adhesion and Adhesives (RAA) committed to publishing peer-reviewed and thought-provoking critical reviews written by subject matter experts covering all aspects of adhesion science and adhesive technology. Our aim is to publish your work efficiently and effectively as possible so the world is aware of it.

Scrivener Publishing journals: 3

Research Area : Macroalgal biomass production and its conversion to bioenergy and value-added products, cellular biotechnology for seedling production and genetic improvement of seaweeds, seaweed biorefinery, nutraceutical supplements.

One of the pioneering applications of foam is in enhanced oil recovery (EOR). A major stumbling-block to the success of foam application in EOR is the adverse influence of oil on foam stability.

The δ -phase which exists in various series of stainless steels is a significant subject in steels science and engineering. The precipitation of the δ -phase is also a widely discussed aspect of the science and technology of stainless steels. The microstructural variation, precipitation mechanism, prediction method, and effects of properties of δ -phase are also of importance in academic ...
