international safety management system pdf
The International Safety Management (ISM) Code provides an international standard for the safe management and operation of ships at sea. The purpose of the ISM Code. To ensure safety at sea and prevent damage to property, personnel and environment. The International Convention for the Safety of Life at Sea adopted the ISM Code in 1994 and incorporated it into chapter IX.

Safety management system (SMS) is a comprehensive management system designed to manage safety elements in the workplace. It includes policy, objectives, plans, procedures, organisation, responsibilities and other measures. The SMS is used in industries that manage significant safety risks, including aviation, petroleum, chemical, electricity generation and others.
