BRANCH-AUTOMATION AND ROBOTICS

Robotics is an interdisciplinary branch of engineering and science that includes mechanical engineering, electronics engineering, computer science, and others. Robotics deals with the design, construction, operation, and use of robots, as well as computer systems for their control, sensory feedback, and information processing.. These technologies are used to develop machines that can substitute ...

Microsoft Robotics Developer Studio (Microsoft RDS, MRDS) is a Windows-based environment for robot control and simulation. It is aimed at academic, hobbyist, and commercial developers and handles a wide variety of robot hardware. It requires the Microsoft Windows 7 operating system.. RDS is based on CCR (Concurrency and Coordination Runtime): a .NET-based concurrent library implementation for ...

Robots and automation systems are no longer limited by onboard resources in computation, memory, or software. "Cloud Robotics and Automation" is a new paradigm where robots and automation systems share data and code and perform computation via networks building on emerging research in cloud computing, Deep Learning, Big Data, open-source software, and government/industry initiatives such as ...
