1. Introduction. Quality Management System (QMS) certification has become a must in todayâ€™s highly competitive construction market. One of the most common methods of quality management system application to a construction company is ISO 9000 certification.

Performance measurement in a quality management system

Decision support system; DSS is a computer-based system that helps decision-makers compile and analyze data to reach an informed decision. It is designed to help decision-makers solve complex problems that are difficult to solve using traditional methods. DSSs are used in a wide range of applications, including business, government, and education. They are typically used to analyze large amounts of data and to identify trends and patterns. DSSs can be used to make decisions about a wide range of issues, including financial, operational, and strategic. They can also be used to monitor and control processes. DSSs are typically used by managers and other decision-makers. They are often used to make decisions about a wide range of issues, including financial, operational, and strategic. They can also be used to monitor and control processes. DSSs are typically used by managers and other decision-makers.
