Progress and Poverty Why there are recessions and poverty amid plenty and what to do about it! Henry George Edited and abridged for modern readers by Bob Drake

Progress - Henry George

The Sherwood number (Sh) (also called the mass transfer Nusselt number) is a dimensionless number used in mass-transfer operation. It represents the ratio of the convective mass transfer to the rate of diffusive mass transport, and is named in honor of Thomas Kilgore Sherwood.. It is defined as follows $Sh = \frac{hL}{D}$ where L is a characteristic length (m); D is mass diffusivity ($m^2.s^{-1}$)

THE ENDOWED PROGRESS EFFECT 505 labeled expectancy-valuemodels (see Klein [1991] for a review). A second, similar perspective on persistence emerges

The Endowed Progress Effect: How Artificial Advancement

In physics, string theory is a theoretical framework in which the point-like particles of particle physics are replaced by one-dimensional objects called strings. It describes how these strings propagate through space and interact with each other. On distance scales larger than the string scale, a string looks just like an ordinary particle, with its mass, charge, and other properties ...

Abstract: Theory of mind (ToM; Premack & Woodruff, 1978) broadly refers to humans' ability to represent the mental states of others, including their desires, beliefs, and intentions. We propose to train a machine to build such models too. We design a Theory of Mind neural network -- a ToMnet -- which uses meta-learning to build models of the agents it encounters, from observations of their ...
