

ocean acidification solutions pdf

Ocean acidification is the ongoing decrease in the pH of the Earth's oceans, caused by the uptake of carbon dioxide (CO₂) from the atmosphere. Seawater is slightly basic (meaning pH > 7), and ocean acidification involves a shift towards pH-neutral conditions rather than a transition to acidic conditions (pH < 7). An estimated 30–40% of the carbon dioxide from human activity released into ...

Ocean acidification - Wikipedia

Confronting Ocean Acidification. We're working at the intersection of science, policy and communication to protect local communities and wildlife from the impacts of ocean acidification.

Ocean Conservancy

Ocean Conservancy is working with you to protect the ocean from today's greatest global challenges. Together, we create science-based solutions for a healthy ocean and the wildlife and communities that depend on it.

About Us - Ocean Conservancy

Seawater, or salt water, is water from a sea or ocean. On average, seawater in the world's oceans has a salinity of about 3.5% (35 g/L, 599 mM). This means that every kilogram (roughly one litre by volume) of seawater has approximately 35 grams (1.2 oz) of dissolved salts (predominantly sodium (Na⁺) and chloride (Cl⁻) ions). Average density at the surface is 1.025 kg/L. Seawater is denser ...

Seawater - Wikipedia

The Earth's climate has changed throughout history. Just in the last 650,000 years there have been seven cycles of glacial advance and retreat, with the abrupt end of the last ice age about 7,000 years ago marking the beginning of the modern climate era and of human civilization.

Evidence | Facts – Climate Change: Vital Signs of the Planet

Many scientists now believe that great white sharks are intelligent, highly inquisitive creatures. When great whites gather, they seem to show different behaviors, from open-mouthed gaping at one another to assertive body-slams. These sharks are top predators throughout the world's ocean, predominantly in temperate and subtropical waters.

Over the course of 87 days, the damaged Macondo wellhead, located around 5,000 feet beneath the ocean's surface, leaked an estimated 3.19 million barrels (over 130 million gallons) of oil into the Gulf of Mexico—making the spill the largest accidental ocean spill in history.

The SeapHOx_{v2} combines the SeaFET_{v2} pH sensor with the SBE 37-SMP-ODO MicroCAT CTD+DO sensor. The SeapHOx_{v2} allows for the integrated data collection of pH with the critical oceanographic and biological measurement of temperature, salinity, and oxygen.

Through NSTA, you'll find leading resources for excellence in teaching and learning and experience growth through robust professional development. Plus you'll meet colleagues across all science disciplines, all grade bands and teaching stages, from the newest teacher to the veteran administrator, who share a passion for science education.

NSTA Journal Article

A healthy and stable climate underpins all life on Earth, supporting nature and people alike. Our lives depend on the natural environment to deliver the food we eat, the air we breathe, the water we drink, the clothes we wear and the products that create jobs and economic security.

Reduce Carbon Emissions & Take Action on Climate Change

New Study Shows Oceans Warmed By 0.02C Since mid-1990s, With Large Areas Cooling ocean. Climate Dispatch. A new analysis of top-to-bottom (0-5,000 m or 3.1 miles) ocean heat content changes since the mid-1990s reveals that (a) large regions of the global ocean have undergone cooling, and (b) the overall net temperature change for 1994-2013 was a modest 0.02C.

This report is a map-based analysis of threats to coral reefs around the world, with particular focus on the countries of the Coral Triangleâ€”Indonesia, Malaysia, Papua New Guinea, the Philippines, Solomon Islands, and Timor-Leste.

Reefs at Risk Revisited in the Coral Triangle | World

The health of our oceans and seas is critical to the economic, social and environmental well-being of the planet. Oceans and seas play a fundamental role in the global climate system and in supporting communities, jobs and livelihoods, food security, human health, biodiversity, economic prosperity and way of life.
