Lumber (American English; used only in North America) or timber (used in the rest of the English speaking world) is a type of wood that has been processed into beams and planks, a stage in the process of wood production. Lumber is mainly used for structural purposes but has many other uses as well. There are two main types of lumber. It may be supplied either rough-sawn, or surfaced on one or ...

A kettle and mixer-tap in one. It's the solution crowded benchtops have been waiting for, and is ideal for replacing an existing mixer tap. The new Uso features a U-shaped design and is available in chrome and matt black. The Uso Multitap provides instantaneous, filtered, near-boiling water for hot drinks, as well as filtered cold water and standard hot water from the same tap.

Straw-bale construction is a building method that uses bales of straw (commonly wheat, rice, rye and oats straw) as structural elements, building insulation, or both. This construction method is commonly used in natural building or "brown" construction projects. Research has shown that straw-bale construction is a

sustainable method for building, from the standpoint of both materials and energy ...

Planning for Construction. To achieve the client's aspirations on cost, programme and quality, planning for construction should start at the very beginning of the design process. Such planning should consider the construction sequence, the design factors that affect buildability, and site practice in terms of typical erection plant.
