Solid State Survivor contains some of Yellow Magic Orchestra's best-known songs, including "Rydeen", which combines Eastern and Western musical styles, in addition to drawing from animal sounds, particularly the rhythms of a running horse. "Rydeen" was often sampled or covered in early chiptune and video game music, including Sega's Super Locomotive (1982), Rabbit Software's Trooper Truck ...

Quantum chemistry computer programs are used in computational chemistry to implement the methods of quantum chemistry. Most include the Hartree-Fock (HF) and some post-Hartree-Fock methods. They may also include density functional theory (DFT), molecular mechanics or semi-empirical quantum chemistry methods. The programs include both open source and commercial software.

All solid-state polymer electrolytes have been received a huge amount of attention in high-performance lithium ion batteries (LIBs) due to their unique characteristics, such as no leakage, low flammability, excellent processability, good flexibility, wide electrochemical stability window, high safety and superior thermal stability.

All solid-state polymer electrolytes for high-performance

All-solid-state (ASS) lithium-ion battery has attracted great attention due to its high safety and increased energy density. One of key components in the ASS battery (ASSB) is solid electrolyte that determines

performance of the ASSB.

When we think of relays, we tend to think of those big mechanical things that make a satisfying “click” when activated. As nice as they are for relay-based computers, there are times when you don’t want to deal with noise or the unreliability of moving parts. This is where solid-state relays (SSRs) are worth considering.
