Vibration is a mechanical phenomenon whereby oscillations occur about an equilibrium point. The word comes from Latin vibrationem ("shaking, brandishing"). The oscillations may be periodic, such as the motion of a pendulum or random, such as the movement of a tire on a gravel road. Vibration can be desirable: for example, the motion of a tuning fork, the reed in a woodwind instrument or ...

Abstract. The ancient Chinese concept of health reaches far beyond the mere absence of symptoms to include the presence of a strong vital energy known as qi. A smooth, harmonious, and active flow of qi creates harmony in the body and a balanced state of being in the person. This personal health is further matched by

health in nature, defined as regular weather patterns and the absence of disasters.
