Mathematics (from Greek μάθημα máthēma, "knowledge, study, learning") is the study of such topics as quantity, structure, space, and change. It has no generally accepted definition.. Mathematicians seek and use patterns to formulate new conjectures; they resolve the truth or falsity of conjectures by mathematical proof.When mathematical structures are good models of real phenomena ...

Mathematics - Wikipedia

In mathematics, computer science and operations research, mathematical optimization or mathematical programming, alternatively spelled optimisation, is the selection of a best element (with regard to some criterion) from some set of available alternatives.. In the simplest case, an optimization problem consists of maximizing or minimizing a real function by systematically choosing input values ...

Mathematical optimization - Wikipedia

Discrete mathematics is the study of mathematical structures that are discrete rather than continuous.In contrast to real numbers that vary "smoothly", discrete mathematics studies objects such as integers, graphs, and statements in logic. These objects do not vary smoothly, but have distinct, separated values. Discrete mathematics therefore excludes topics in "continuous mathematics" such as ...

The Development of Mathematics, in a Nutshell. Though mathematical knowledge is ancient, stretching back to the Stone Age, the evolution of mathematics to its current modern state has seen fundamental changes in concepts, organization, scope, outlook, and practice.Without understanding the evolution of mathematical

thought, it is difficult to appreciate modern mathematics in its contemporary ...

Einstein summation is a notational convention for simplifying expressions including summations of vectors, matrices, and general tensors. There are essentially three rules of Einstein summation notation, namely: 1. Repeated indices are implicitly summed over. 2. Each index can appear at most twice in any term. 3. Each term must contain identical non-repeated indices.

Einstein Summation -- from Wolfram MathWorld

The Mathematics Kindergarten to Grade 9 Program of Studies has been derived from The Common Curriculum Framework for K - 9 Mathematics: Western and Northern Canadian Protocol, May 2006 (the Common Curriculum Framework).The program of studies incorporates the conceptual framework for Kindergarten to Grade 9 Mathematics and the general outcomes and specific outcomes that were established in the ...
