problems involving the kinetics of particles you can look at the problems in chapter 3 of this supplement. Each chapter will have a short introduction that summarizes the types of problems and computational methods used. This would be the ideal place to look if you are interested in finding examples of how to use specific functions, operations etc.

SYSTEM DYNAMICS MODELS IN MANAGEMENT PROBLEMS SOLVING Dejana Zlatanovic * The models represent the key methodological tool for management problems solving in System Dynamics (SD) as a functionalist systems methodology. Above all, it is about mathematical models, built according to appropriate feedback structures, i.e. specific elements and flows that form feedback loops. Since SD is based ...
