Normal Anatomy. The hip is a ball-and-socket joint, which exhibits a wide range of motion in all directions. The spherical acetabular socket covers the femoral head nearly completely except for its inferior medial aspect, known as the acetabular notch, where the socket is deficient (,, Figs 1, ,,,, 2).The transverse acetabular ligament spans this deficient portion of the acetabulum.

Almost all of my running injuries stem from one problem area: my right hip and hamstring. My most recent injury iteration is a pain in the hip flexor (psoas major and/or iliacus if you want to get technical), so Iâ€™ve been dealing by: taking time off running,; stretching, foam rolling, and strengthening.
