

the ethology of predation pdf

Ethology is the scientific and objective study of animal behaviour, usually with a focus on behaviour under natural conditions, and viewing behaviour as an evolutionarily adaptive trait. Behaviourism is a term that also describes the scientific and objective study of animal behaviour, usually referring to measured responses to stimuli or trained behavioural responses in a laboratory context ...

Ethology - Wikipedia

Predation is a biological interaction where a predator (a hunting animal) kills and eats its prey (the organism that is attacked). Predators are adapted and often highly specialized for hunting, with acute vision, hearing, and sense of smell. Many have sharp claws and jaws to grip, kill, and cut up their prey. In ecology, predators are heterotrophic, getting all their energy from other organisms.
