

the moon is a pdf

The Moon is an astronomical body that orbits planet Earth and is Earth's only permanent natural satellite. It is the fifth-largest natural satellite in the Solar System, and the largest among planetary satellites relative to the size of the planet that it orbits (its primary). The Moon is after Jupiter's satellite Io the second-densest satellite in the Solar System among those whose densities ...

Moon-landing conspiracists focus heavily on NASA photos. They point to oddities in photos and films taken on the Moon. Photography experts (including those unrelated to NASA) answer that the oddities are what one would expect from a real Moon landing, and not what would happen with tweaked or studio imagery.
