Shock is the state of low blood perfusion to tissues resulting in cellular injury and inadequate tissue function. The typical signs of shock are low blood pressure, rapid heart rate, signs of poor end-organ perfusion (e.g., low urine output, confusion, or loss of consciousness), and weak pulses.. Shock is divided into four main types based on the underlying cause: hypovolemic, cardiogenic ...

Non-small cell lung cancer (NSCLC) accounts for approximately 85% of all lung cancers. Histologically, NSCLC is divided into adenocarcinoma, squamous cell carcinoma (SCC) (see the image below), and large cell carcinoma.

Non-Small Cell Lung Cancer: Practice Essentials

Down syndrome (DS or DNS), also known as trisomy 21, is a genetic disorder caused by the presence of all or part of a third copy of chromosome 21. It is typically associated with physical growth delays, characteristic facial features, and mild to moderate intellectual disability. The average IQ of a young adult with Down syndrome is 50, equivalent to the mental ability of an 8 or 9-year-old ...

Down syndrome - Wikipedia

Lunginflammation är en sjukdom som drabbar lungorna och påverkar framförallt de mikroskopiska luftvägarna. [1] [2] Det inflammatoriska tillståndet orsakas vanligtvis av en infektion av virus eller bakterier. Mer sällan kan man få lunginflammation också av andra mikroorganismer, vissa läkemedel eller andra tillstånd, till exempel autoimmuna sjukdomar.
