Vibration-Free Platforms cure the shakes by providing benchtop vibration isolation in both the vertical and horizontal direction, from Terra Universal

Vibration-Free Platforms from Terra Universal

Microfabrication is the process of fabricating miniature structures of micrometre scales and smaller. Historically, the earliest microfabrication processes were used for integrated circuit fabrication, also known as "semiconductor manufacturing" or "semiconductor device fabrication". In the last two decades microelectromechanical systems (MEMS), microsystems (European usage), micromachines ...

Highly Flexible MoS 2 Thin-Film Transistors with Ion Gel Dielectrics

Highly Flexible MoS2 Thin-Film Transistors with Ion Gel

An industrial filter press is a tool used in separation processes, specifically to separate solids and liquids. The process uses the principle of pressure drive, [clarification needed] as provided by a slurry pump. Among other uses, filter presses are utilized in marble factories in order to separate water from mud in order to reuse the water during the marble cutting process.
